Related and/or Auxiliary Software. If the software requires the use of third party software, or if the code supersedes or is an extension of earlier software, please identify such software here.

Also, identify any programs not considered an integral part of this software but used in conjunction with it (e.g., for preparing input data, plotting results, or coupled through use of external data files). Note similar library software, when known.

Where your software incorporates or is a derivative work of some other software, it is important that you (i) identify the original software, (ii) from where you obtained it, and (iii) any applicable copyright notices and licenses accompanying such software (attach copies of any licenses or other copyright notices as separate pages as necessary).

I believe myself to be a developer (i.e. author and/or inventor) of the above-described software program. (Each developer must sign.)

INSTRUCTIONS

Who Uses This Form: All U.S. Department of Energy (DOE) offices, contractors, and financial assistance recipients.

When to Use this Form: Complete one copy of this form for each software package submitted or announced to the Energy Science and Technology Software Center (ESTSC) at the DOE Office of Scientific and Technical Information in accordance with established DOE Orders. Additional information concerning preparation can be found in DOE G 241.1-1A. Questions may be referred to ESTSC at (865) 576-2606, Fax (865) 576-6436, and/or E-mail: ESTSC@ADONIS.OSTI.GOV.

Part II: STI PRODUCT MEDIA/FORMAT and LOCATION/TRANSMISSION

A. HARDWARE REQUIREMENTS - Hardware and installation environment requirements necessary for full utilization of the software. Include memory and RAM requirements in addition to any nonstandard features.

B. SOFTWARE REQUIREMENTS -

1. Operating System/Version
2. Compiler/Version
3. Limitations/Restrictions/Timing Requirement Estimate
4. Other Special Requirements
5. Related Auxiliary Software
6. Type(s) of Files: Types of files provided on the media, for example, source code, text library, etc.

C. MEDIA TYPE INFORMATION - An explanation of the type of media (diskette, CD, etc.) provided with the package.

D. DOCUMENTATION - The documentation type and format provided with the package.

E. REFERENCES - List citations of pertinent publications by author, title, report number, barcode, or order number (if available) and date. References are to be broken down into two groupings: 1) reference documents provided with the submittal package and 2) additional background reference materials generally available.

ITEM INSTRUCTIONS :

Part I. STI SOFTWARE DESCRIPTION

A. SOFTWARE TITLE - The title, acronym, and KWIC (keywords in context) title of the software.

B. DEVELOPER(s) - The primary software developer should be listed first. Multiple names acceptable. Allows for "NONE" as an option for few cases where necessary.

E-mail Address(es) - Provide in same order as developer names. Will be used only by OSTI staff.

C. SITE PRODUCT NUMBER - Unique site number that identifies software product.

1. DOE Contract/Grant Number(s) - Required for all (can be "NONE").
2. R&D Project ID(s) - A unique and permanent ID assigned to identify a particular research project or funding source.
3. Software or Other Identifying Number(s) - If appropriate, includes CRADA number, LDRD number, B&R code, etc.

D. ORIGINATING RESEARCH ORGANIZATION - The organization/site submitting the software.

E. RELEASE DATE/DATE OF ISSUANCE - Identifies the software release date. Standard format to be followed (e.g. follow rules of inputting), but requires standard 4-digit year.

F. SPONSORING ORGANIZATION - The sponsoring or funding office of the work reported in the STI product. "USDOE" is the default value.

G. OTHER - Information useful to include in published announcement record, but which is not suited for any other field on this form.

H. DESCRIPTION/ABSTRACT - Text should be spell-checked, limited in length to 2000 characters, and follow input standards for special characters. Describe the purpose of the computer program, state the problem being solved and summarize the program functions and capabilities (highlight the advantages, distinguishing features and/or special capabilities). Provide a short summary of the mathematical methods, engineering principles, numerical algorithms and procedures incorporated into the software. DO NOT INCLUDE SENSITIVE INFORMATION IN THE DESCRIPTION/ABSTRACT.
